

## WORSHIP TEAM NEXT STEPS

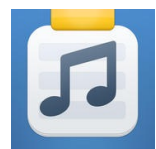

### Order Some In-Ear Headphones

- **KZ ZST Dynamic Hybrid Dual Driver In Ear Earphones** [\[link\]](#) \$19 (These headphones currently get the best reviews from worship leaders around the world for the quality and price. They are great entry-level in-ears for singers and musicians.)
- **Panasonic ErgoFit** [\[link\]](#) \$8 (These are good entry-level in-ears for singers and musicians. Several of our team members have used these and not had any issues.)

*In-ears can range in prices from \$8 to \$2,000 (and up). If you are looking to spend more money on higher quality in-ear headphones, talk to me and I can help steer you in the right direction. The above are just good entry-level headphones recommended by hundreds of worship leaders across the country.*

### Get The Apps For Your Devices

- **M32-Q** (This app is used to control our in-ear monitor mixes. Just make sure you're connected to the Wi-Fi and use this IP Address: 192.168.1.195.)
- **Planning Center Services** (This app is primarily used to view each week's set list, see notes from the worship leader, listen to the songs, and practice along.)
- **Planning Center Music Stand** (This app is primarily used for viewing chord charts and sheet music for each week's set list. You can take and save notes on each page within the app.)
- **Pro Metronome** (Optional. Since we play to a metronome each week, this app is a great free resource to practice along with at home.)

### Connect Your Devices To The Wi-Fi Networks

- The network password is the same for the church office and YMCA, but you have to type in the password to both of them the first time you connect. Look for the networks that says "worship" and type in "**waxbeforeyou.**"
